Sample report

Your DNA results for political preferences

Your results are ready!

The results below are based on research which investigated the underlying genetic effects on economic and political preferences. The charts below indicate your likely political orientation, blue indicating liberal leanings and red indicating conservative leanings. See the detailed explanation below.

How to use this report

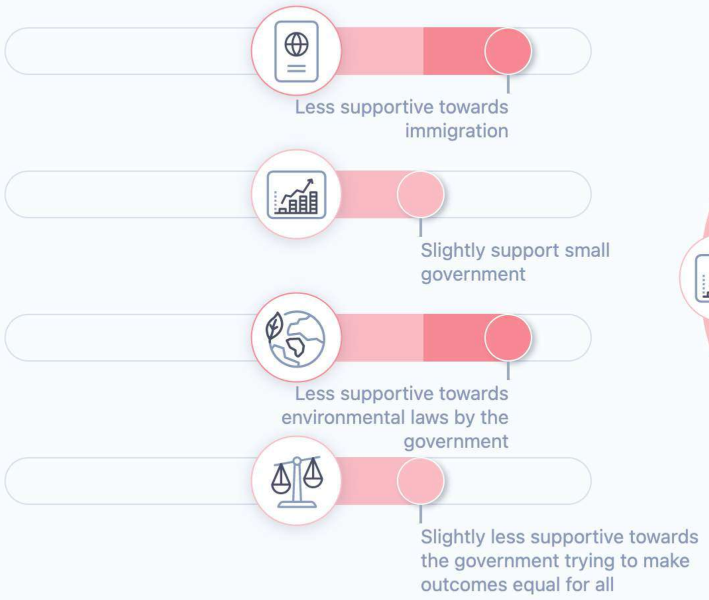
1 Check out your DNA predisposed political views

2 Take a survey to know your current political views

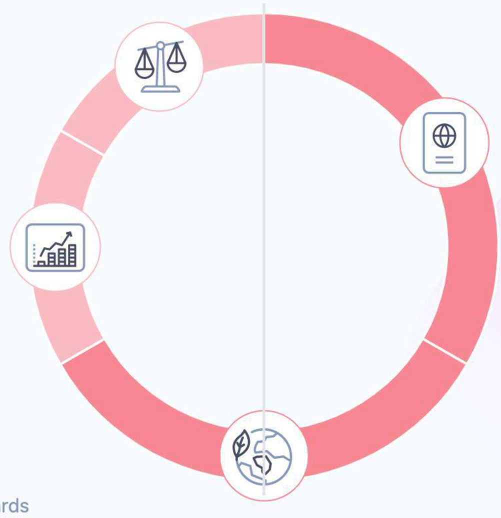
3 Compare your political views between DNA-based and Quiz-based results

DNA predisposed summary

Level of support



Ratio



Immigrant Policy

One facet of political preference is opinion on various immigration policies, including issues regarding labor immigration, refugees, and providing economic support to immigrants.

Economic Policy

Views on economic policy can be classified as preference for government size and it reflects one's way of thinking regarding money flow in the country. For example, it may indicate preference for the levels of taxation and the balance between the number of businesses in the private and public sectors.

Environmental Policy

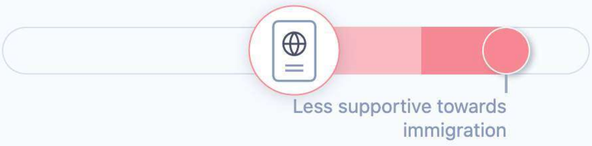
Environmentalism, classified as a philosophical ideology and an influence in political preferences, can be referred to as a social movement or as a way of thinking focused on protecting and conserving the elements of the earth's ecosystem, including water, air, animals and plants.

Social Equality Policy

Social equality policy, classified as political preferences, can be referred to as the belief that all people in society should have equal social, political, and economic rights and opportunities, regardless of characteristics such as gender, race, and religion.

Immigrant Policy

Level of support

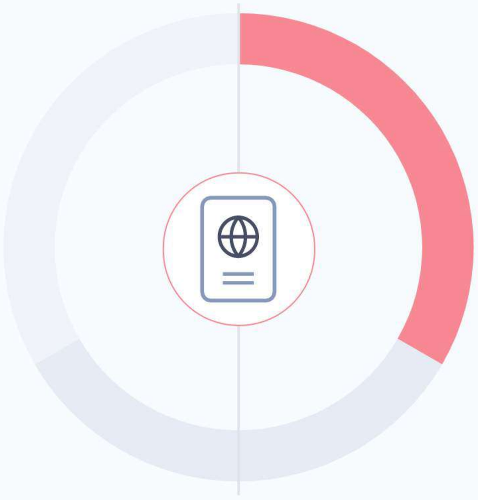


Less supportive towards immigration

You are less likely to support immigration and policy that is less friendly towards immigration.

What are your real preferences? CHECK

Ratio



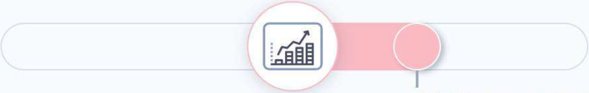
This result shows how much you tend to support immigration. This DNA predisposition is based on your tendency to support policies such as "Increas[ing] the economic support to immigrants so that they can preserve their own culture".

Your genotypes which correlate with **Immigration Policy** preference

Result	Scientific Reliability	Chrom	SNP ID
CC Less supportive towards immigration	★☆☆☆	chr2	rs3789119
TT Less supportive towards immigration	★☆☆☆	chr6	rs240768
	★☆☆☆	chr18	rs1346987
	★☆☆☆	chr21	rs16998084

Economic Policy

Level of support



Slightly support small government

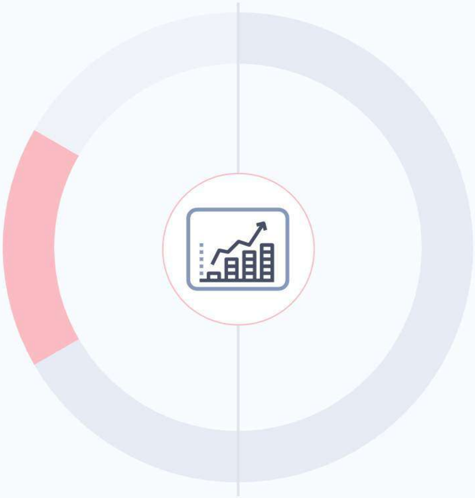
Slightly support small government

You tend to be centrist but slightly support a smaller government with less regulation.

What are your real preferences?

CHECK

Ratio



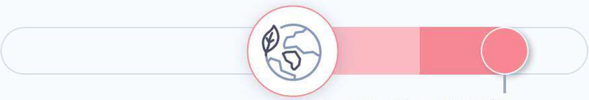
This result shows how much you may tend to support small government over large government. The DNA predisposition is based on your tendency to support policies like "Decreas[ing] the public sector," "Decreas[ing] taxes," and "Sell[ing] public companies to private buyers."

Your genotypes which correlate with **Economic Policy** preference

Result	Scientific Reliability	Chrom	SNP ID
TT Support small government	★☆☆☆	chr3	rs13073838
TT Support small government	★☆☆☆	chr11	rs7101446
TC Intermediate	★☆☆☆	chr12	rs10772939
TC Intermediate	★☆☆☆	chr17	rs2360111

Environmental Policy

Level of support



Less supportive towards environmental laws by the government

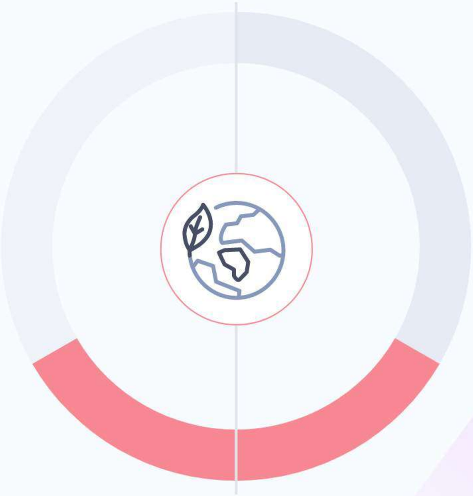
Less supportive towards environmental laws by the government

You are less likely to support environmental laws by the government, and that regulations for the environment are needed.

What are your real preferences?

CHECK

Ratio



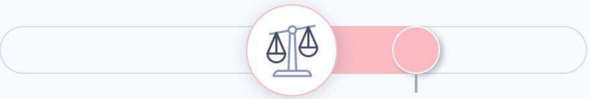
This result shows how much you might tend to support environmental laws. This DNA predisposition is based on your tendency to support policies including “Stop motoring in the inner city,” “Invest[ing] more to prevent environmental damages,” and “Decreas[ing] carbon dioxide emissions.”

Your genotypes which correlate with **Environmental Policy** preference

Result	Scientific Reliability	Chrom	SNP ID
CC Less supportive towards environmental laws by the government	★☆☆☆	chr3	rs1397924
GG Less supportive towards environmental laws by the government	★☆☆☆	chr14	rs4902960

Social Equality Policy

Level of support



Slightly less supportive towards the government trying to make outcomes equal for all

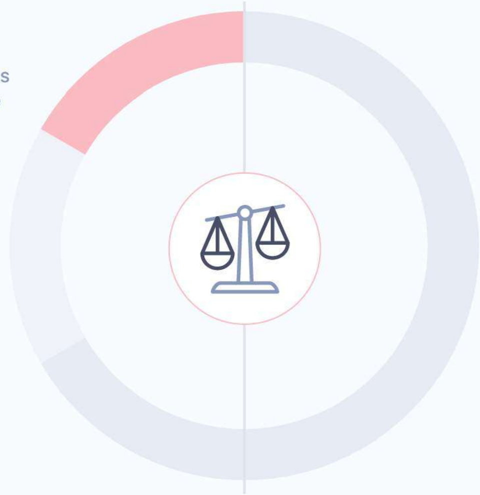
Slightly less supportive towards the government trying to make outcomes equal for all

You tend to be centrist but slightly less likely to support the government trying to make outcomes equal for all.

What are your real preferences?

CHECK

Ratio



This result shows how much you may tend to support the government trying to achieve equality for all. The DNA predisposition is based on your tendency to support policies such as “Decreas[ing] income inequality in society,” and “Increas[ing] the economic support to rural areas.”

Your genotypes which correlate with **Social Equality Policy** preference

Result	Scientific Reliability	Chrom	SNP ID
GG Less supportive towards the government trying to make outcomes equal for all	★☆☆☆	chr1	rs4384209
TC Intermediate	★☆☆☆	chr3	rs1682825
TC Intermediate	★☆☆☆	chr10	rs2250149
TC Intermediate	★☆☆☆	chr11	rs11233413

AG Intermediate	★☆☆☆	chr12	rs2120771
AG Intermediate	★☆☆☆	chr22	rs4823246

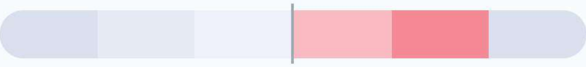
Comparison Details

Immigration Policy

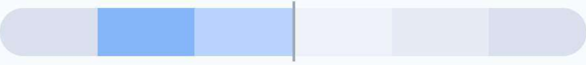
DNA — Less supportive towards

Reality — Support immigration

immigration



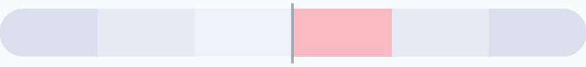
You are less likely to support immigration and policy that is less friendly towards immigration.



You tend to support immigration and policy that is friendlier towards immigration.

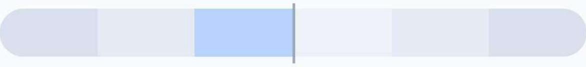
Economic Policy

DNA — Slightly support small government



You tend to be centrist but slightly support a smaller government with less regulation.

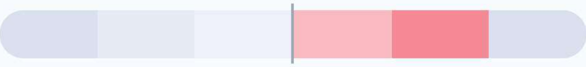
Reality — Slightly support big government



You tend to be centrist but slightly support government regulation more than no regulation.

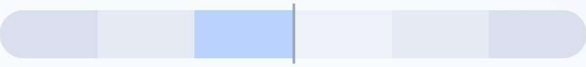
Environmental Policy

DNA — Less supportive towards environmental laws by the government



You are less likely to support environmental laws by the government, and that regulations for the environment are needed.

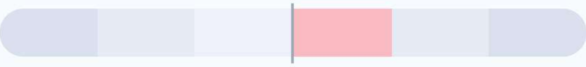
Reality — Slightly support environmental laws by the government



You tend to be centrist but slightly support environmental laws by the government, and that regulations for the environment are needed.

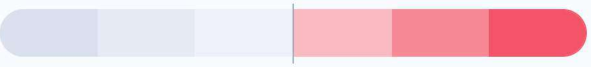
Social Inequality Policy

DNA — Slightly less supportive towards the government trying to make outcomes equal for all



You tend to be centrist but slightly less likely to support the government trying to make outcomes equal for all.

Reality — Strongly less supportive towards the government trying to make outcomes equal for all



You are much less likely to support the government trying to make outcomes equal for all.
